INVEST IN YOUR CHILD

Fund Raising Program

Last year's donation program had an overwhelming response. I will gladly go along with the previous year's request to donate instead of selling some sort of merchandise. It will be easier on everyone concerned; students, parents, and school personnel. If everyone who voted for the 'Invest In Your Child' program a year ago participates again and new parents get involved it will be a successful fundraiser.

The majority of funds raised last year went towards the copy machine expense and new sound equipment for the school. We were also able to help offset the cost of copy paper, phones, and were able to put funds in the each grade level to be spent on student needs.

This year my goal is to again help with the cost with the copy machine but more importantly I noticed the glaring need for an updated security system. In addition to these two goals we need to continue to build upon technology within the building. I would like to see the addition of a video data projector and whiteboard for each grade level. These are all goals that we need your help reaching.

Wouldn't it be great if we did not have to bother with such things? If we want to do more than the minimum, fundraising for public schools is not only necessary, it is essential. I greatly appreciate the cooperative spirit of Lakeview parents and friends. Without your assistance, Lakeview would not be the school that it is.

Along with this letter you should find an 'Invest In Your Child' envelope that should be sent back with your donation. We would like to finish up with the program within a two week period of time, but we understand if you need additional time to make your donation. You will receive a receipt for your donation so it can be used at tax time.

Thank you in advance for your participation!
